# DISCLAIMERS AND NOTES

- In office extras include tests such as EKG and strep tests, procedures such as joint injections and laceration repair and in office treatments such as breathing treatments, antibiotic injections and IV fluids.
- Prices for patients with insurance are negotiated with each insurance company by a group of physicians with which we are partnered.
- Big Tree cannot participate in Medicare and Medicaid due to government restrictions on our business model. Big Tree is not health insurance.
- Family discounts are available.
- You can cancel any membership any time after the 3rd month. You may switch between plans during our annual open enrollment period.
- There is a \$150 fee to restart a plan that has been canceled or switch between plans. This is designed to prevent patients from gaming the system.
- Wholesale costs for medications are listed on our website. Wholesale prices for labs cannot be published, but range on the order of 90% off of the retail price.
- We follow principles of medical triage to respond to messages and provide appointments. While we try to get back to everyone as quickly as possible, certain medical emergencies may preclude a rapid response in rare cases.
- Group plans require 2 persons.
- Pay-as-I-Go patients may utilize a limited number of appointment slots each day and will be schedule at the next available time. They may call the main number to get an appointment. The price of the visit depends upon the medical complexity of the visit. Patients who pay on the day of the visit may be eligible for a discount.
